 . 10th Self + Richardson.

About the same number of birds as 1946. Very severe winter - lasting the whole of March. Heavy hail storms at hatching time. Three out of four days made shooting difficult by high winds and birds getting up wild.

Fine weather, good show of birds, definitely an improvement.

South. wind made driving difficult on 31st also similar drives on consecutive days proved unmg.

Sept. 2nd - Mr. Iles, Ed Bee, R. Brown, L. Hinton, Rev Jaffinder, D. Peachey,
J. Honour, G. B. Metcalfe.

Practically no birds at all to be seen, as they had all died owing to the snow/frost in May. The heather was black & dead from the frost, everything in a very depressing state & it may take years to recover, as so many moors appear to be in the same state.
